

Review: the long lines

Name: _____

Date: _____

Work out each answer. Do what is inside the brackets first, then multiply and divide, then add and subtract.

1. $30 \div (8 + 2) \times 25 \div 5$ =

2. $9 \times 15 \div (5 - 2) - 8$ =

3. $28 \div (6 + 8) + 11 + 4$ =

4. $2 \times 15 \div (11 - 8) + 8$ =

5. $10 \div (8 - 6) - 12 \div 6$ =

6. $2 + 5 + 7 \times (2 + 7)$ =

7. $38 \div (11 + 8) + 33 \div 11$ =

8. $9 \div 3 \times (10 + 11) \div 3$ =

9. $2 - 40 \div (12 + 8) + 5$ =

10. $9 \times 40 \div 8 - (7 + 8)$ =

11. $60 \div 12 \times (7 - 4) + 6$ =

12. $7 + 42 \div (12 + 2) + 4$ =

Answer key: Review: the long lines

Work out each answer. Do what is inside the brackets first, then multiply and divide, then add and subtract.

1. $30 \div (8 + 2) \times 25 \div 5 = 15$

2. $9 \times 15 \div (5 - 2) - 8 = 37$

3. $28 \div (6 + 8) + 11 + 4 = 17$

4. $2 \times 15 \div (11 - 8) + 8 = 18$

5. $10 \div (8 - 6) - 12 \div 6 = 3$

6. $2 + 5 + 7 \times (2 + 7) = 70$

7. $38 \div (11 + 8) + 33 \div 11 = 5$

8. $9 \div 3 \times (10 + 11) \div 3 = 21$

9. $2 - 40 \div (12 + 8) + 5 = 5$

10. $9 \times 40 \div 8 - (7 + 8) = 30$

11. $60 \div 12 \times (7 - 4) + 6 = 21$

12. $7 + 42 \div (12 + 2) + 4 = 14$
